

Production rate -250 t/h

- **4 classification fractions in one module possible**
- **Washing by spraying and shearing (attritition)**
- **Sorting by screening and additional moduls**
- **Closed water cycle**
- **Modular plant, easy to add and to expand**
- **Transportation in only 5 containers possible**
- **Semimobile design, easy and fast to install**

Compact, modular design, sublementable with:

- **Flotation cell**
- **Gravimetric separator**
- **Upstream classifier**
- **Wet magnet-filter systems**
- **Active carbon-filter, heavy metal polymer filter**
- **Fine rotation or cross-flow filter systems**
- **Wet ballistic-gravimetric impuls separator**
- **Log washer, attritition**
- **Sedimentation tank etc.**

Compact modular washing and screening plant for many applications!

Ideal for mineral processing and recycling of mineralic waste
like:

- Stony soil
- Aggregates
- Minerals, Ores
- Used Railway ballast
- Slag from incineration or metallurgical provenance
- Glas waste
- Construction material
- Winter grit waste
- Used playground sand
- Filter sand, canal and sewage plant sand etc.
